Technical Knowledge Specialist

The test results stated in this report relate only to the item(s) tested. This test report may not be reproduced except in full, without written approval of Intertek.

Tests identified with an asterisk (\*) have been subcontracted.

**Chemical Analysis:** Total Lead (Surface Coating)

Procedure: Analysis of the surface coating/wet paint was performed by *Inductively Coupled Argon Plasma Spectroscopy* to determine compliance with **16 CFR 1303**.

Requirement: The lead content shall not exceed 600 ppm of the dried paint film as required by **16 CFR 1303**.

However, as of August 14, 2009, the limit for total lead content will be lowered to 90 ppm in accordance with the Consumer Product Safety Improvement Act of 2008 (CPSIA).

Sample Utilized: Coating Removed from Product

Test Results:

	Results (ppm)	Limit (ppm)
	1	
<b>Total Lead</b>	<10	600

Component	Description
1	Vietnam Honey

**Conclusion:** When tested as specified, the submitted sample **does comply** with 16 CFR 1303/CPSIA Section 101(f) requirements.
