

# **NOTE: THIS SET OF INSTRUCTIONS MUST BE DONE FIRST**

Footboard

Headboard

## Elevation kit instructions (Captain's Bed)

**These instructions are needed to install the wood strips onto you bed frame so the elevation drawer pedestal you purchased may be installed.**

- 1) Unpack Bed headboard, footboard and drawer unit.
- 2) From the drawer unit box, gather the 2 strips of wood, 2 templates and 4 screws.

### **FOOTBOARD -**

- 3) Lay the footboard on the ground with the inside of the footboard facing up. (6 holes for rails versus 4 for the outside)
- 4) Place the template labeled "footboard" on the footboard and line it up with the bottom of the footboard as shown in picture 1.
- 5) Take one of the strips of wood and lay across the footboard so it rest in the notch on the template.
- 6) Take one of the screws and place it in the hole of the wood strip and drive screw into the footboard. Do not drive screw all the way down at this point.
- 7) Remove template, flip over and do the opposite side of the footboard the same exact way. At this point both screws can be made tight but be careful not to over tighten.

### **HEADBOARD -**

- 8) Assemble the headboard support legs to the headboard per instructions included with the bed. (do only this part of the bed assemble at this point)
- 9) Lay headboard and legs down on ground with the inside of the headboard facing up (6 holes)
- 10) Place the template labeled "headboard" and line it up with the bottom of the support leg as shown in picture 4.
- 11) Take the second strip of wood and lay across the headboard support legs so it rest in the notch on the template shown in picture 3.
- 12) Take one of the screws and place in hole of wood strip and drive it into the headboard leg. Do not drive screw all the way down at this point.
- 13) Remove template flip over and do the other headboard leg the same exact way. At this point both screws can be made tight but be careful not to over tighten.

**The bed is now ready to be completely assembled per the instructions in the bed box. After the bed is completely assembled, simply slide the drawer unit onto the sticks you just installed.**
